NEW DELHI 3 (INDIA) :

The 19th March 1951.

S. P. JAIN,

for Registrar General, India

## NATIONAL SAVINGS

## CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 24th February, 1951.

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 24th February 1951, relate to 158 towns with an estimated population of 19,658 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 68% of the total number of towns representing 68% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,984 and 7,147 representing birth and death rates of 29.1 and 18.9 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 138 towns with an estimated population of 16,992 thousands. Information about Assam, Bihar and Bombay could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 68% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 9,642 and 6,389 representing

birth and death rates of 29.5 and 19.6 per thousand of population respectively. The table at the end gives the position by States.

Tanjore in Madras and Cuttack in Orissa were the only towns which had a high death rate of 66.6 and 58.3 per thousand of population. The high death rate in Calcutta was mainly due to deaths from Smallpox and fever, while the high death rate in Tanjore was not due to any of the specified causes.

(B) States (Part B).—The data here relate to 20 towns with an estimated population of 2,666 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 63% of the total number of towns representing 70% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,342 and 758 representing birth and death rates of 26.2 and 14.8 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
